

Your Benefits:

- Performance monitoring for L2, L3 VPNs to assure service level agreement (SLA) for businesses
- PM Controller functionality (appliance/VNF) supports Y.1731, TWAMP, ICMP Echo ("ping"), and UDP Echo opposite RAD devices or third-party responders
- RADview PM supports SLA reporting with drill-down capabilities per PM session
- Optional service assurance upgrade with MiNID:
 - Easy plug-and-play installation in existing installed base
 - Unique form factor reduces space and power consumption requirements
- L2 (Y.1731) and L3 (TWAMP) test generation and response
- Service activation testing
- Analysis of micro-bursts affecting QoE
- Deep end-to-end visibility and performance monitoring across heterogeneous networks and equipment types, independent of installed-base capabilities

Products Included in this Solution:

ETX-2/ETX-2i
IP and Carrier Ethernet Demarcation with D-NFV

MiNID
Miniature Programmable Network Interface Device

PM Controller
Performance Monitoring Generator

RADview
Management and Domain Orchestration
